

Portwein Anarchism

This anarchist movement is built on the idea of full liberty in the vast space. They believe that with the infinity of the Universe, fighting and centralized distribution of resources becomes a rather useless tasks. Despite being rather marginal, one can find their little secluded settlements everywhere around space populated by sentient civilizations.

The human Portwein Anarchists adopted a mix of stereotypical pirate stylistics heavily influenced by the punk motives, thus the name.

Despite their communities being rather secretive, the anarchists do not mind doing freelance jobs and sometimes getting involved in crime affairs.
