

# Impostor's drone

## Request

We have discovered recently a strange signal, coming from an unknown location. The origin seems human, but the protocol is horribly outdated, dating back to the beginning of 21st century. Such relics are quite common in the Solar system, but here, of all places... Would you mind checking it out? The payment will be more than generous.

## On arrival to the abandoned ship

Player communicates with the probe.

## Success
